Week 06: Review

Expectations, API review, Canvas review

Instructor: Paweena Prachanronarong

CCLab Meeting

Expectations:

- I do not expect anyone to become an expert in any of these areas, since this class is meant to give you a general overview of JS, Arduino and oF.

  Note: I won't hold it against you if you do become an expert ;-)

Expectations:

- I do not expect anyone to become an expert in any of these areas, since this class is meant to give you a general overview of JS, Arduino and oF. **Note: I won't hold it against you if you do become an expert ;-)**

- I am not grading you on who has to coolest projects, but how much you've grown as a student. **I am looking for personal growth and how much you push yourself.**

Expectations:

- I do not expect anyone to become an expert in any of these areas, since this class is meant to give you a general overview of JS, Arduino and oF. **Note: I won't hold it against you if you do become an expert ;-)**

- I am not grading you on who has to coolest projects, but how much you've grown as a student. **I am looking for personal growth and how much you push yourself.**

- Write about something you learned on your own every week on the blog.

Homework Expectations:

- Not everyone's homework will work. But **post something** to show me that you're at least trying.

- I do check homework.

- When there are issues, we can go back and review.
